Computer Science undergraduate (B.Tech, 2028) seeking a Software Development / Full Stack internship. Solved 100+ LeetCode problems, participated in 10+ competitions and hackathons, and built projects in Java, MySQL and JavaScript, including a Razorpay-integrated e-commerce platform.

Work Experience

Full Stack Developer Intern

Thiranex Education | Remote

Aug 2026 - Sep 2026

4 weeks

- Built an e-commerce website with a 40-product catalogue across 6 categories, with search, filters, cart and checkout.
- Designed and implemented 12 REST API endpoints (/products, /cart, /orders) using Node.js and Express with MySQL, including input validation and error handling.
- Integrated Razorpay with server-side order creation and payment verification, tested across 3 scenarios (success, failure, cancellation).
- Tested APIs with Postman (25 requests), fixed 10 bugs, and collaborated in a team of 3 using Git feature branches and 12 pull requests.

Education

JSS Academy of Technical Education

Computer Science & Engineering | B.Tech | Noida

2024 - 2028

AKTU

St. John’s School

ICSE | Class XII

ICSE

St. Mary’s Convent School

ICSE | Class X

ICSE

Skills

Hard Skills

Java, JavaScript, MySQL, HTML5, CSS3, Node.js, Express, REST APIs, Gemini API, Git, GitHub, Postman, JUnit, UI Design, Data Structures & Algorithms, Object-Oriented Programming (Java), Computer Networks, Operating Systems, DBMS

Soft Skills

Problem Solving, Analytical Thinking, Team Collaboration, Adaptability, Quick Learning, Communication

Projects

Expense Tracker

Java, JDBC, MySQL

- Built a CRUD application with 6 expense categories and monthly spending summaries, tested on 50 sample records.
- Added search and filter by date, category and amount.
- Used PreparedStatement to prevent SQL injection and a DAO/service layered structure; wrote 8 JUnit tests covering core operations.

Gym Website

HTML5, CSS3, JavaScript

- Built a fully responsive site with 5 sections (programs, plans, trainers, gallery, contact) across 3 breakpoints.

- Achieved Lighthouse scores of 95 (Performance) and 92 (Accessibility).
- Deployed on Netlify, debugged layout issues with Chrome DevTools, and managed the project in 15+ Git commits.

AI Chatbot for Elderly Care

HTML5, CSS3, JavaScript, Gemini API

- Built a chatbot with 3 reminder types (daily tasks, medicines, birthdays) using the Gemini API.
- Tested with 5 users (family and seniors) and improved the interface based on their feedback (larger fonts, simpler layout).
- Added a “consult your doctor” disclaimer to medicine suggestions.
